DIMENSIONS

Dimensions

Thanks to our in-house production, the dimensions of the metal shelf (length, width, and height) can be customized according to your wishes.

CONSTRUCTION

RAL 9005 Jet Black

RAL 9006 White Aluminium

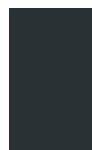

RAL 9007 Grey Aluminium

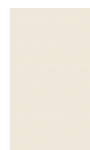

RAL 8019 Grey Brown

RAL 7030 Stone Grey

RAL 7016 Anthracite

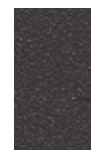

RAL 9001 Cream White

RAL 3005 Wine Red

RAL 1002 Sand Yellow

DB 703 Glimmer

Construction

The frame of the shelf is made of powder-coated steel, resistant to all weather conditions and maintenance-free.

RAL Chart

The shelf can be painted in any color from the full RAL palette. For guidance, we list the 10 most popular colors.

A photograph of a balcony railing with wooden panels. A yellow rectangular overlay is on the left side with the word "PANELS" in white. A potted plant sits on the railing. The background shows a blurred outdoor scene with trees and a building.

Angelim

Sibirski macesen

Wood

To add warmth and a natural look, it is possible to combine the structure with wooden panels. We use types of wood known for their durability and resistance in outdoor environments. Weather resistance, long lifespan, and low maintenance are key factors when selecting wood for outdoor use.

Wood durability

The most common choices are teak, cumaru (Brazilian teak), ipe, angelim, and Siberian larch — among the most durable wood types.

Atlas Plan Stone

Atlas Plan is a technical stone — a composite of porcelain, ceramic, and quartz. Thanks to its exceptional strength, it is highly resistant to impact, scratches, heat, frost, and UV rays, and is easy to clean due to its low porosity.
